Outdoor Printed Metal Maintenance INSTRUCTIONS

MAINTANING YOUR OUTDOOR PRINTED METAL

All outdoor printed metal plaques (except anodized and stainless steel) are coated with a clear poly paint to help protect the metal from corrosion. Based on where the plaques are installed, periodic cleaning of this coating may be required. Wash these plaques with a soft cloth and warm, soapy (dish washing liquid) water. Cleaning with harsh cleaners that contain chemicals is not recommended, as this may damage the clear poly coating. We recommend cleaning every few months, or as needed to preserve the original finish.
